Plain Language Summary

1. **Applicant Name:** Triumvirate Environmental LLC

2. **Application Type:** Major Amendment

3. **Type and Amount of Radioactive Material:** The facility receives containerized solid, liquid, and gaseous wastes. Solid contaminated wastes include items commonly used in laboratories and industry where radioactive materials are handled and could include animal tissue, disposable syringes, broken glassware, personal protective equipment (PPE), contaminated equipment, sealed sources, naturally-occurring radioactive material (NORM), etc. The facility also accepts animal carcasses as well as vials, bottles and containers of liquid and solid radioactive materials.

   Total volume of waste stored at the facility will not exceed more than 4,000 55-gallon drum equivalents at any one time.

4. **Type of Facility**: Radioactive waste processing and storage facility.

5. **Facility Name and Location:** Triumvirate Environmental LLC located at 5711 Etheridge St., Houston, Texas 77087.

6. **Function of proposed plant or facility**: Triumvirate Environmental LLC is purchasing the existing radioactive waste processing and storage facility owned by Nuclear Sources and Services Inc. and will be maintaining the facility's current operations.

7. **How facility will control radioactive effluents and contamination:** Triumvirate Environmental LLC will control radioactive effluents and radioactive contamination in accordance with our approved radioactive materials license and supporting plans and procedures as approved by the Texas Commission on Environmental Quality so that the facility will not have an adverse impact on human health or the environment.
